PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 3 years of MERN stack experience and 1+ year of dedicated AI/GenAI engineering practice. Skilled in building production-grade web applications with React.js, Node.js, Next.js, and TypeScript, and designing RAG pipelines using LangChain, LangGraph, Pinecone, and FAISS. Delivered a 35% improvement in frontend render performance through lazy loading, code splitting, and memoisation. Hands-on with Agentic AI workflows, LLM integration (Groq / OpenAI), Docker, and AWS (EC2, S3, Lambda, IAM). Immediate joiner seeking Full Stack, Node.js, React.js, or AI/GenAI Engineer roles.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, Python, HTML5, CSS3
Frontend	React.js, Next.js, Redux Toolkit, Tailwind CSS, ShadCN UI, Socket.io
Backend	Node.js, Express.js, FastAPI, Django, RESTful API Design, BullMQ
Databases	MongoDB (Mongoose), MySQL, PostgreSQL
Vector Databases	Pinecone, FAISS, ChromaDB
AI / GenAI	LangChain, LangGraph, RAG Pipelines, Agentic AI, Generative AI, LLM Integration (Groq / OpenAI)
DevOps & Cloud	Docker, AWS (EC2, S3, Lambda, IAM), CI/CD Pipelines, Git, GitHub
Concepts	RAG Architecture, Agent Workflows, State Management, Performance Optimisation, Version Control

WORK EXPERIENCE

Freelance Full Stack & AI Developer — Self-Employed | Remote Jan 2026 – Present

- Designed and delivered end-to-end MERN stack web applications for clients, covering frontend (React.js, Next.js) and backend (Node.js, Express.js) development.
- Built and integrated AI/GenAI features including RAG pipelines (LangChain, Pinecone) and LLM-powered chatbot interfaces for client projects.
- Developed client-facing websites and landing pages using Next.js, TypeScript, and Tailwind CSS with a focus on SEO, performance, and responsive design.
- Designed and documented RESTful APIs for various business workflows, third-party integrations, and internal tooling.

Full Stack Developer — Prism Infoways Pvt. Ltd | Gurugram, India Nov 2024 – Dec 2025

- Led end-to-end MERN stack development (MongoDB, Express.js, React.js, Node.js) of scalable, production-grade web applications.
- Optimised frontend performance via lazy loading, code splitting, and memoisation — achieving a 35% improvement in render time.
- Architected Redux Toolkit state management to improve data flow and cross-component synchronisation.
- Built RESTful APIs with Express.js and Mongoose following security and scalability best practices.
- Containerised applications with Docker for consistent dev/prod environments; leveraged AWS EC2, S3, Lambda, and IAM.
- Delivered features across four products: Labour Law, Autobotnexus, Infant Formula, and Prism, enhancing UX and system reliability.

Full Stack Web Developer — SheerBulls India Pvt. Ltd | Gurugram, India May 2023 – Oct 2024

- Developed scalable React.js frontend applications focused on performance optimisation and responsive user experience.
- Built and maintained Node.js / Express.js backend services enabling seamless frontend-backend integration.
- Designed and integrated RESTful APIs supporting business workflows and third-party service integrations.
- Managed and optimised application data across MongoDB and MySQL databases.
- Maintained clean, version-controlled codebases using Git and GitHub with team collaboration workflows.

PROJECTS

PharmaLens AI — Healthcare Strategy Intelligence Platform Mar 2026 – Present

- Python · FastAPI · OpenAI API (GPT-4) · python-pptx · Exa Web Search API · Docker · Prompt Engineering · REST APIs
- Built an end-to-end AI pipeline that ingests a drug name or disease indication, runs real-time web search via Exa API, and auto-generates a structured strategic brief across three analytical layers — Today (current landscape), Tomorrow (2–3 year horizon), and Strategic Signals.
 - Designed an 800+ line system prompt governing output schema, character limits, quality rules, scope validation, and anti-patterns; implemented an AI content-fitting layer (OpenAI GPT-4) to summarise long-form content to exact pixel-level box constraints per slide.
 - Engineered a regex-based markdown parser with multi-pattern fallback logic to extract structured fields (Tensions, Signals, Implications, Strategy Map) from free-form LLM output.

- Built an 11-slide auto-generated PowerPoint engine (python-pptx) with dynamic font sizing and overflow protection; reduced strategic brief creation from 8–12 hours of manual research to under 3 minutes end-to-end.
- Containerised the full application with Docker and exposed modular FastAPI routes for PPT generation, project history, search, and file uploads.

MERN Real-Time Chat Application

Jan 2026 – Feb 2026

MongoDB · Express.js · React.js · Node.js · Redux Toolkit · Socket.io · JWT

- Built a real-time chat application with Socket.io supporting one-to-one messaging and online/offline user status tracking.
- Implemented secure authentication with JWT, protected routes, and bcrypt password hashing.
- Designed a fully responsive UI with React.js and Tailwind CSS, optimised for desktop and mobile.

Praans Consultech – Labour Law Website (praansconsultech.com)

Sep 2024 – Nov 2024

Next.js · TypeScript · ShadCN UI · RESTful APIs · SSR

- Developed production website using Next.js, TypeScript, and ShadCN UI with SSR, code splitting, and lazy loading for SEO performance.
- Integrated RESTful APIs for contact forms, inquiries, and dynamic content management.

EDUCATION

Bachelor of Computer Applications (BCA) — University of Lucknow, Lucknow, UP

Aug 2018 – Jul 2021
