PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 3 years of MERN stack experience and dedicated AI/GenAI engineering practice. Proficient in building production-grade web applications with React.js, Node.js, Next.js, and TypeScript, and architecting RAG pipelines using LangChain, LangGraph, Pinecone, and FAISS. Achieved a 35% improvement in frontend render performance through lazy loading, code splitting, and memoization. Hands-on with Agentic AI workflows, LLM integration (Groq / OpenAI), Docker, and AWS (EC2, S3, Lambda, IAM). Immediate joiner seeking Full Stack, Node.js, React.js, or AI/GenAI Engineer roles.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, Python, HTML5, CSS3
Frontend	React.js, Next.js, Redux Toolkit, Tailwind CSS, ShadCN UI, Socket.io
Backend	Node.js, Express.js, FastAPI, Django, RESTful API Design, BullMQ
Databases	MongoDB (Mongoose), MySQL, PostgreSQL
Vector Databases	Pinecone, FAISS, ChromaDB
AI / GenAI	LangChain, LangGraph, RAG Pipelines, Agentic AI, Generative AI, LLM Integration (Groq / OpenAI)
DevOps & Cloud	Docker, AWS (EC2, S3, Lambda, IAM), CI/CD Pipelines, Git, GitHub
Concepts	RAG Architecture, Agent Workflows, State Management, Performance Optimisation, Version Control

WORK EXPERIENCE

Freelance Full Stack & AI Developer — Self-Employed | Remote Jan 2026 – Present

- Planned and delivered end-to-end MERN stack web applications for clients, covering frontend (React.js, Next.js) and backend (Node.js, Express.js) development.
- Integrated AI/GenAI features including RAG pipelines (LangChain, Pinecone) and LLM-powered chatbot interfaces for client projects.
- Created client-facing websites and landing pages using Next.js, TypeScript, and Tailwind CSS with a focus on SEO, performance, and responsive design.
- Documented and published RESTful APIs for various business workflows, third-party integrations, and internal tooling.

Full Stack Developer — Prism Infoways Pvt. Ltd | Gurugram, India Nov 2024 – Dec 2025

- Led end-to-end MERN stack development (MongoDB, Express.js, React.js, Node.js) of scalable, production-grade web applications.
- Boosted frontend performance via lazy loading, code splitting, and memoization — achieving a 35% improvement in render time.
- Architected Redux Toolkit state management to improve data flow and cross-component synchronization.
- Constructed RESTful APIs with Express.js and Mongoose following security and scalability best practices.
- Containerized applications with Docker for consistent dev/prod environments; leveraged AWS EC2, S3, Lambda, and IAM.
- Shipped features across four products: Labour Law, Autobitnex, Infant Formula, and Prism, enhancing UX and system reliability.

Full Stack Web Developer — SheerBulls India Pvt. Ltd | Gurugram, India May 2023 – Oct 2024

- Built scalable React.js frontend interfaces focused on performance optimization and responsive user experience.
- Maintained Node.js / Express.js backend services enabling seamless frontend-backend integration.
- Structured and integrated RESTful APIs supporting business workflows and third-party service integrations.
- Administered and optimized application data across MongoDB and MySQL databases.
- Maintained clean, version-controlled codebases using Git and GitHub with team collaboration practices.

Frontend Developer Intern — Digital Exports Marketing | Noida, India Oct 2022 – Mar 2023

- Assisted in developing and maintaining frontend interfaces using HTML, CSS, JavaScript, and React.js.
- Collaborated with design and backend teams to implement UI components and enhance overall user experience.
- Gained hands-on exposure to version control (Git/GitHub) and agile development practices.

PROJECTS

PharmaLens AI — Healthcare Strategy Intelligence Platform Mar 2026 – Present

Python · FastAPI · OpenAI API (GPT-4) · python-pptx · Exa Web Search API · Docker · Prompt Engineering · REST APIs

- Engineered an end-to-end AI pipeline that ingests a drug name or disease indication, runs real-time web search via Exa API, and auto-generates a structured strategic brief across three analytical layers — Today (current landscape), Tomorrow (2–3 year horizon), and Strategic Signals.
- Crafted an 800+ line system prompt governing output schema, character limits, quality rules, scope validation, and anti-patterns; implemented an AI content-fitting layer (OpenAI GPT-4) to condense long-form content to exact pixel-level box constraints per slide.
- Constructed a regex-based markdown parser with multi-pattern fallback logic to extract structured fields (Tensions, Signals, Implications, Strategy Map) from free-form LLM output.
- Developed an 11-slide auto-generated PowerPoint engine (python-pptx) with dynamic font sizing and overflow protection; slashed strategic brief creation from 8–12 hours of manual research to under 3 minutes end-to-end.
- Containerized the full application with Docker and exposed modular FastAPI routes for PPT generation, project history, search, and file uploads.

MERN Real-Time Chat Application Jan 2026 – Feb 2026

MongoDB · Express.js · React.js · Node.js · Redux Toolkit · Socket.io · JWT

- Created a real-time chat application with Socket.io supporting one-to-one messaging and online/offline user status tracking.
- Implemented secure authentication with JWT, protected routes, and bcrypt password hashing.
- Produced a fully responsive UI with React.js and Tailwind CSS, optimized for desktop and mobile.

Praans Consultech – Labour Law Website (praansconsultech.com) Sep 2024 – Nov 2024

Next.js · TypeScript · ShadCN UI · RESTful APIs · SSR

- Launched a production website using Next.js, TypeScript, and ShadCN UI with SSR, code splitting, and lazy loading for SEO performance.
- Incorporated RESTful APIs for contact forms, inquiries, and dynamic content management.

EDUCATION

Bachelor of Computer Applications (BCA) — University of Lucknow, Lucknow, UP Aug 2018 – Jul 2021
