PROFESSIONAL SUMMARY

Full Stack Developer and AI/GenAI Engineer with 3+ years of experience building production-grade MERN applications and RAG pipelines (LangChain, LangGraph, Pinecone). Delivered a 35% frontend performance improvement and hands-on with Agentic AI, LLM integration, Docker, and AWS. Immediate joiner seeking Full Stack or AI/GenAI Engineer roles.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Python, HTML5, CSS3
- **Frontend:** React.js, Next.js, Redux Toolkit, Tailwind CSS, ShadCN UI, Socket.io
- **Backend:** Node.js, Express.js, FastAPI, Django, RESTful API Design, Microservices, API Gateway, BullMQ
- **Databases:** MongoDB (Mongoose), MySQL, PostgreSQL, Redis | Vector DBs: Pinecone, Qdrant, FAISS, ChromaDB
- **AI / GenAI:** LangChain, LangGraph, RAG Pipelines, Agentic AI, Multi-Agent Systems, Tool Calling, Generative AI, LLM Integration (Groq / OpenAI)
- **DevOps & Cloud:** Docker, AWS (EC2, S3, Lambda, IAM), CI/CD Pipelines, Git, GitHub

WORK EXPERIENCE

Full Stack Developer — Genisys Enterprises Pvt Ltd | Noida, India (Hybrid)

Jan 2026 – Present

- Planning and delivering end-to-end MERN stack web applications, covering frontend (React.js, Next.js) and backend (Node.js, Express.js) development.
- Integrating AI/GenAI features including RAG pipelines (LangChain, Pinecone) and LLM-powered chatbot interfaces into product workflows.
- Building client-facing websites and landing pages using Next.js, TypeScript, and Tailwind CSS with a focus on SEO, performance, and responsive design.
- Documenting and publishing RESTful APIs for various business workflows, third-party integrations, and internal tooling.

Full Stack Developer — Prism Infoways Pvt. Ltd | Gurugram, India

Nov 2024 – Dec 2025

- Led end-to-end MERN stack development (MongoDB, Express.js, React.js, Node.js) of scalable, production-grade web applications.
- Boosted frontend performance via lazy loading, code splitting, and memoization — achieving a 35% improvement in render time.
- Architected Redux Toolkit state management to improve data flow and cross-component synchronization.
- Constructed RESTful APIs with Express.js and Mongoose following security and scalability best practices.
- Containerized applications with Docker for consistent dev/prod environments; leveraged AWS EC2, S3, Lambda, and IAM.
- Shipped features across four products — Labour Law, Autobotnexus, Infant Formula, and Prism — enhancing UX and system reliability.

Full Stack Web Developer — SheerBulls India Pvt. Ltd | Gurugram, India

May 2023 – Oct 2024

- Built scalable React.js frontend interfaces focused on performance optimization and responsive user experience.
- Maintained Node.js / Express.js backend services enabling seamless frontend-backend integration.
- Structured and integrated RESTful APIs supporting business workflows and third-party service integrations.
- Administered and optimized application data across MongoDB and MySQL databases.

Frontend Developer Intern — Digital Exports Marketing | Noida, India

Oct 2022 – Mar 2023

- Assisted in developing and maintaining frontend interfaces using HTML, CSS, JavaScript, and React.js.
- Collaborated with design and backend teams to implement UI components and enhance overall user experience.

PROJECTS

Multi-Agent AI Orchestration Platform (MERN Stack)

Apr 2026 – Present

React.js · Node.js · Express.js · MongoDB · LangGraph · LangChain · RAG · Microservices · API Gateway · Tool Calling · Streaming AI Responses · Qdrant · Redis · Redux · Docker · AWS

- Architected a multi-agent AI system on a microservices backend, with a dedicated API Gateway routing requests across specialized LangGraph agents for task planning, retrieval, and execution.
- Implemented tool-calling agent workflows (LangChain/LangGraph) enabling agents to invoke external APIs and internal services autonomously, with structured handoff between agents.
- Built a RAG pipeline backed by Qdrant vector database for low-latency semantic retrieval, and used Redis for caching, session state, and inter-service message queuing.
- Delivered real-time streaming AI responses to the React.js/Redux frontend via WebSockets/SSE, keeping UI state in sync during long-running agent executions.
- Containerized each microservice independently with Docker and deployed the platform on AWS, enabling independent scaling of the agent, retrieval, and gateway services.

PharmaLens AI — Healthcare Strategy Intelligence Platform

Mar 2026 – Present

Python · FastAPI · OpenAI API (GPT-4) · python-pptx · Exa Web Search API · Docker · Prompt Engineering · REST APIs

- Engineered an end-to-end AI pipeline that ingests a drug name or disease indication, runs real-time web search via Exa API, and auto-generates a structured strategic brief across three analytical layers — Today, Tomorrow, and Strategic Signals.
- Crafted an 800+ line system prompt governing output schema, character limits, quality rules, and scope validation; implemented an AI content-fitting layer (GPT-4) to condense content to pixel-level slide constraints.
- Developed an 11-slide auto-generated PowerPoint engine (python-pptx) with dynamic font sizing and overflow protection; slashed strategic brief creation from 8–12 hours to under 3 minutes end-to-end.
- Containerized the full application with Docker and exposed modular FastAPI routes for PPT generation, project history, search, and file uploads.

IoT-Based Machine Monitoring & Production Dashboard (MERN Stack)

Jan 2026 – Feb 2026

React.js · Node.js · Express.js · MongoDB · REST APIs · JWT · Aggregation Pipeline · Git

- Developed a real-time machine monitoring and production dashboard for a manufacturing company using the MERN stack.
- Built APIs to track machine production, downtime, issue count, machine status, and shift-wise performance, providing live operational insights.
- Implemented automatic 8-hour shift management, generating production reports and analytics for each shift based on machine data.
- Designed dashboards displaying daily production, machine utilization, downtime, issue resolution time (MTTR), and performance metrics.
- Optimized backend APIs and MongoDB queries to handle continuous machine data and deliver fast dashboard performance.

Praans Consultech — Labour Law Website (praansconsultech.com)

Sep 2024 – Nov 2024

Next.js · TypeScript · ShadCN UI · RESTful APIs · SSR

- Launched a production website using Next.js, TypeScript, and ShadCN UI with SSR, code splitting, and lazy loading for SEO performance.
- Incorporated RESTful APIs for contact forms, inquiries, and dynamic content management.

EDUCATION

Bachelor of Computer Applications (BCA) — University of Lucknow, Lucknow, UP

Aug 2018 – Jul 2021
